COMMERCIAL FERTILIZERS FOR 1928.

Compiled and edited under the supervision of N. E. Gordon, State
Chemist; and L. E. Bopst, Assistant.

INTRODUCTION

This publication is the 1928 number of the fertilizer registration bulletin issued annually, on January 15th, by the Maryland Inspection Service. In it are listed and described all brands of fertilizer which had been registered for 1928 delivery up to the date of going to press (January 12th).

The data here compiled are presented for the information and guidance of prospective purchasers of fertilizers. Every successful planter realizes that two brands of fertilizer of exactly the same grade may produce widely differing results when applied to a given soil and crop. It is only by taking into consideration the ingredients from which the various plant foods are derived that an intelligent selection can be made.

The conscientious manufacturer is likewise aided by the dissemination of this information. The success of his business depends upon satisfied customers and any device which aids the buyer in selecting the goods best suited to his needs reacts, in the long run, toward the greater prosperity of the fertilizer industry. Furthermore, the publicity so obtained should not be rated too lightly. Many buyers wisely refuse to purchase brands concerning which they have not complete information.

Since this publication was first placed upon an annual basis, constant efforts have been made to enlist the co-operation of manufacturers to the end that the ideal of one hundred per cent. advance registration might be approached. The response has not been as yet all that could be desired, although continual improvement is noticeable. Of the 1,014 brands registered in 1926, only 367, or about one-third, appeared in the January bulletin. Over one-half, or 519 out of 993 brands registered in 1927, were listed in January. The present issue includes 532 brands.

The Department wishes to assure fertilizer buyers that registration information is available to them at all times and that all inquiries concerning brands licensed subsequent to the appearance of this publication will be promptly answered.

The Maryland Standard Twelve

Agriculture is beginning to awaken to the fact that some of the principles of standardization which have proved so profitable in other industries are applicable to its own problems. Agricultural authorities and fertilizer manufacturers themselves have long realized that a considerable annual loss is

sustained by fertilizer users generally by reason of the needless multiplicity of brands and analyses which encumber the market. With a view to remedying that situation the Maryland Department of Soils some years ago selected and recommended twelve analyses which offer a range adapted to the crop and soil conditions of all sections of the State. It will be noted that all of these are "high-grade" mixtures—that is, they all contain fourteen or more units of plant food. The following table shows the amounts of these brands sold during the past five years.

SALES OF THE MARYLAND STANDARD-TWELVE, 1922-23-24-25-26

Analysis	Units of Plant Food	Tons Sold 1922	Tons Sold 1923	Tons Sold 1924	Tons Sold 1925	Tons Sold 1926
7-6-5	18	7,456	9,084	10,106	6,681	8,131.28
4-8-4	16	4,227	4,800	6,207	6,407	5,162.49
5-8-5	18	3,090	4,269	4,980	5,843	8,281.70
2-12-2	16	1,652	1,786	3,414	3,596	3,080.21
0-12-6	18	818	952	1,344	1,490	1,567.80
0-10-4	14	696	753	754	251	383.40
10-5-0	15	251	133	173	140	415.78
2-12-4	18	0	116	1,186	1,238	2,229.77
3-10-6	19	0	10	316	1,168	1,106.20
6-8-4	18	0	0	116	86	89.
3-8-8	19	0	0	936	1,185	2,209.
4-12-0	16	0	0	.1	0	0.
Total Tons Sold ---		18,190	21,903	29,532.1	28,085	32,656.
Percentage of Total Tonnage ----		11.6%	14.1%	19.5%	16.9%	20%

The general trend of the tonnage of the above brands has been upward but too gradually to have any effect on production costs or prices.

The following pages contain a detailed list, together with the composition, of the different brands of fertilizer registered for 1928 delivery:

COMMERCIAL FERTILIZERS FOR 1928.

Compiled and edited under the supervision of N. E. Gordon, State
Chemist; and L. E. Bopst, Assistant.

INTRODUCTION

This publication is the 1928 number of the fertilizer registration bulletin issued annually, on January 15th, by the Maryland Inspection Service. In it are listed and described all brands of fertilizer which had been registered for 1928 delivery up to the date of going to press (January 12th).

The data here compiled are presented for the information and guidance of prospective purchasers of fertilizers. Every successful planter realizes that two brands of fertilizer of exactly the same grade may produce widely differing results when applied to a given soil and crop. It is only by taking into consideration the ingredients from which the various plant foods are derived that an intelligent selection can be made.

The conscientious manufacturer is likewise aided by the dissemination of this information. The success of his business depends upon satisfied customers and any device which aids the buyer in selecting the goods best suited to his needs reacts, in the long run, toward the greater prosperity of the fertilizer industry. Furthermore, the publicity so obtained should not be rated too lightly. Many buyers wisely refuse to purchase brands concerning which they have not complete information.

Since this publication was first placed upon an annual basis, constant efforts have been made to enlist the co-operation of manufacturers to the end that the ideal of one hundred per cent. advance registration might be approached. The response has not been as yet all that could be desired, although continual improvement is noticeable. Of the 1,014 brands registered in 1926, only 367, or about one-third, appeared in the January bulletin. Over one-half, or 519 out of 993 brands registered in 1927, were listed in January. The present issue includes 532 brands.

The Department wishes to assure fertilizer buyers that registration information is available to them at all times and that all inquiries concerning brands licensed subsequent to the appearance of this publication will be promptly answered.

The Maryland Standard Twelve

Agriculture is beginning to awaken to the fact that some of the principles of standardization which have proved so profitable in other industries are applicable to its own problems. Agricultural authorities and fertilizer manufacturers themselves have long realized that a considerable annual loss is

191641

sustained by fertilizer users generally by reason of the needless multiplicity of brands and analyses which encumber the market. With a view to remedying that situation the Maryland Department of Soils some years ago selected and recommended twelve analyses which offer a range adapted to the crop and soil conditions of all sections of the State. It will be noted that all of these are "high-grade" mixtures—that is, they all contain fourteen or more units of plant food. The following table shows the amounts of these brands sold during the past five years.

SALES OF THE MARYLAND STANDARD-TWELVE, 1922-23-24-25-26

Analysis	Units of Plant Food	Tons Sold 1922	Tons Sold 1923	Tons Sold 1924	Tons Sold 1925	Tons Sold 1926
7-6-5	18	7,456	9,084	10,106	6,681	8,131.28
4-8-4	16	4,227	4,800	6,207	6,407	5,162.49
5-8-5	18	3,090	4,269	4,980	5,843	8,281.70
2-12-2	16	1,652	1,786	3,414	3,596	3,080.21
0-12-6	18	818	952	1,344	1,490	1,567.80
0-10-4	14	696	753	754	251	383.40
10-5-0	15	251	133	173	140	415.78
2-12-4	18	0	116	1,186	1,238	2,229.77
3-10-6	19	0	10	316	1,168	1,106.20
6-8-4	18	0	0	116	86	89.
3-8-8	19	0	0	936	1,185	2,209.
4-12-0	16	0	0	.1	0	0.
Total Tons Sold ---		18,190	21,903	29,532.1	28,085	32,656.
Percentage of Total Tonnage ----		11.6%	14.1%	19.5%	16.9%	20%

The general trend of the tonnage of the above brands has been upward but too gradually to have any effect on production costs or prices.

The following pages contain a detailed list, together with the composition, of the different brands of fertilizer registered for 1928 delivery:
